## **TECHNICAL INFORMATION**

## Deosan

## Cleaning and disinfecting liquid

RegNo 3627/08		
General Information:	<ul> <li>Deosan is a preparation of quaternary ammonium compounds with wide-ranging micro-biocidal effectiveness.</li> <li>Deosan is suitable for using to sanitary equipment, as well as various equipment in public facilities such as restaurants, hotels, schools, beauty salons and households.</li> <li>Product is intended to use for clean and disinfection of surfaces, materials, equipment and furniture, pipework associated with the production, transport, storage or consumption of food or feed for humans and animals.</li> </ul>	
	<ul> <li>rapid efficacy</li> <li>good microbi</li> <li>clean and dis</li> </ul>	
Physical Data:	Form: Density: pH-Wert:	liquid concentrate approx. 1.0 g/cm <sup>3</sup> 6 - 8
Important ingredients:	Quaternary ammonium compounds (9.6g/100g)	
Safety advice:	Use biocides safely. Always read the label and product information before use. For relevant hazard and precautionary statements please refer to the safety data sheet.	
Waste water behavior:	We are not aware of negative influence on the environment if the product is used according to our instructions and respecting local legislations and regulations, if applicable.	
Storage advice:	Protect against direct sunlight and other sources of heat and ignition. Keep containers tightly closed. Store in cool, dry conditions. Avoid exposure to frost and heat.	
Application:	Time: Temperature:	undiluted 15 min 20ºC mechanically or by hand.
	Evidence of efficiency according to EN 1276, 1650, 13624, 13697, 13727, 14562	

When using these products, all applicable safety regulations for the use of chemicals must be observed. For storage information, hazard and precautionary statements, please refer to the applicable safety data sheet. Application solutions and product remnants must be discarded in compliance with official regulations. The information given reflects our actual experience. With regard to varying operational conditions, this information is noncommittal and to be used as advice only. Therefore, we assume no liability whatsoever, including claims from third parties. 2019-12-11

## **TECHNICAL INFORMATION**

According to governmental regulations, cleaning agents and disinfectants must be rinsed off product-contacting surfaces using drinking-quality water without leaving any residues.

As a rule, the application conditions depend on the type and level of soiling as well as the condition of the installation. An individual, operational application recommendation should be established in a pilot test.

For professional use only.

When using these products, all applicable safety regulations for the use of chemicals must be observed. For storage information, hazard and precautionary statements, please refer to the applicable safety data sheet. Application solutions and product remnants must be discarded in compliance with official regulations. The information given reflects our actual experience. With regard to varying operational conditions, this information is noncommittal and to be used as advice only. Therefore, we assume no liability whatsoever, including claims from third parties. 2019-12-11
